## SAFETY WALKWAY MATS

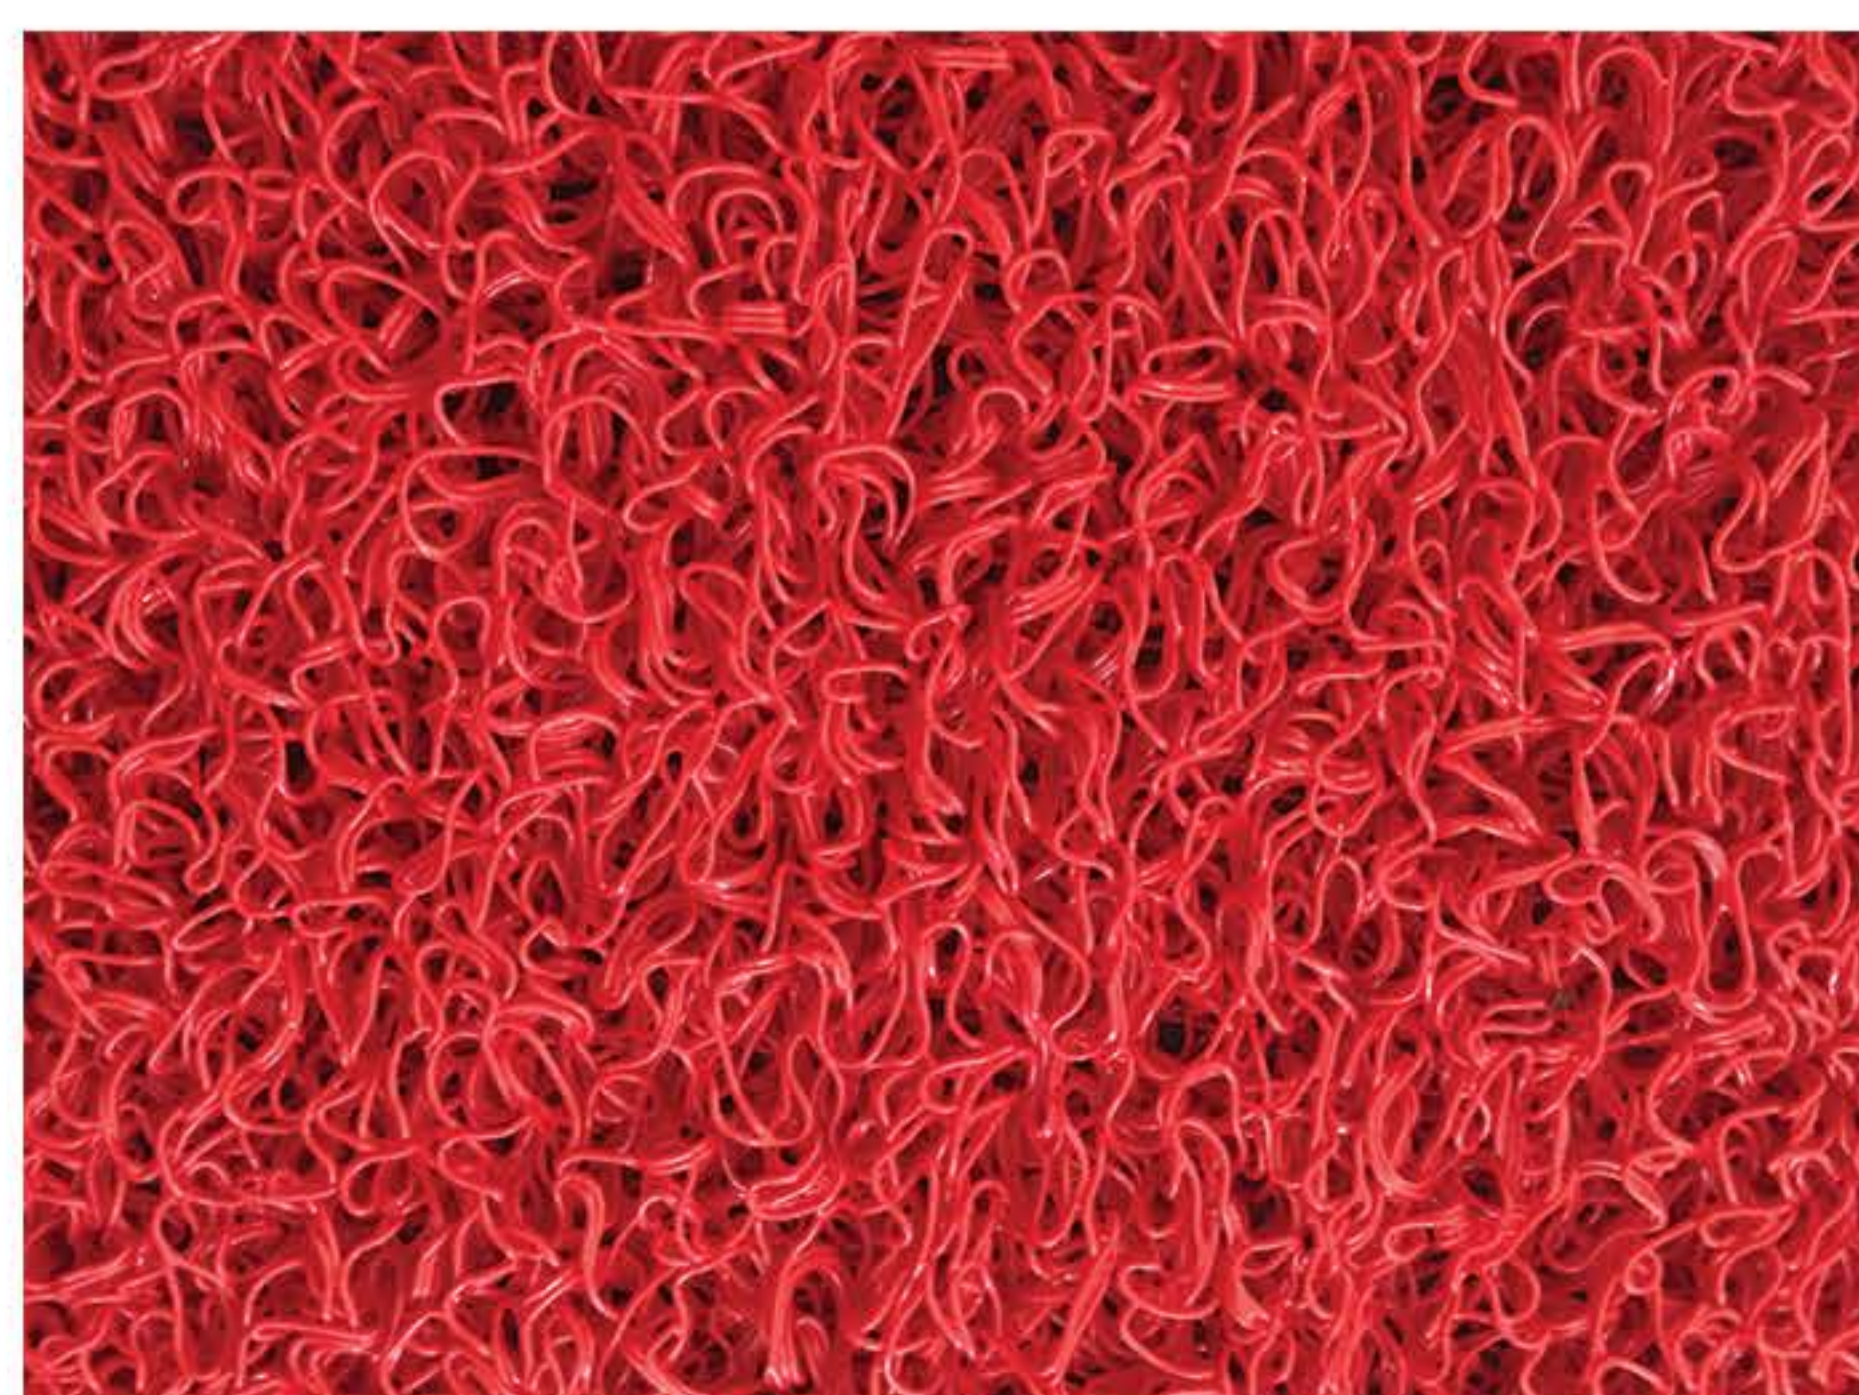

Terrain Mat has been specially designed to be laid on loose surfaces or un-prepared ground and used as a safe walking and traffic zone within construction sites for work staff and trades people. Terrain Mat provides heavy duty performance and has been structured to allow for water and dirt to pass through whilst maintaining a safe walking surface on top. Terrain Mat is designed to provide energy absorbancy under foot which provides a very ergonomic working environment for workstaff.

Terrain Mat is very durable including resistance to mould and fungal attack as well as with-standing frost and thaw cycles. Terrain Mat provides a colour fast, fire resistant walkway solution for high traffic, exterior applications. Terrain Mat comes ready to use and is very easy to install by ether laying flat on it's own or using it's own fixing system to anchor it. Terrain Mat can be printed with signage or logos and can be produced in other colours to meet your specification. Terrain Mat come in two grades:

### Terrain Mat 2

### Terrain Mat 4
