

TACK-MAT

LT-200

TEMPORARY PROTECTION MATS

Innovative Products Awards 2015

Industry Choice Winner

Skudo Tack-Mat

Our most versatile product is here - the new Tack-Mat with an extremely simple "Peel & Stick" application can be applied to almost any surface and removed, then re-applied again and again. Tack-Mat leaves no residue even on the most sensitive surfaces making it the most technologically advanced and user friendly product available.

Skudo Tack-Mat is a multi layer, all in one temporary protection system that is simply peeled and applied to virtually whatever surface you wish to protect (*Please review PDS for more information on suitable substrates*). Tack-Mat is completely water proof therefore any spill or stain will not penetrate making it perfect for delicate surfaces. Tack-Mat will even protect against damaging chemicals and stains such as solvents, oils, and inks.

Tack-Mat is extremely strong and suitable for trade traffic and even light machinery. Because Tack-Mat actually sticks to the surface, this creates the highest level of safety for workers as slip-page is non-existent.

TACK - MAT protects -
